Office Action Summary	Application No. 10/762,234	Applicant(s) TSENG ET AL.	
	Examiner Karl D. Frech	Art Unit 2876	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2876

1. Applicant's amendment filed 10/12/05 has been entered. Claims 1-3 have been amended; claims 4-5 have been added.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hollingsworth et al US 2003/0200379A1 in view of Mambakkam et al US 2003/0093606. Hollingsworth discloses that a computer BIOS searches for a boot disk to allow an operating system to be loaded from the disk. It is disclosed that the disk may be connected via a USB [0024]. It is disclosed that the operating system may be held in a flash memory storage [0019],[0026]. It is disclosed that the BIOS searches for a boot device through the USB [0030]. Hollingsworth does not disclose that the USB device

Art Unit: 2876

supports at least two types of flash media. Official Notice is taken that USB devices containing support for at least two types of flash media formats is old and well known. (It is noted that this holding of Official Notice is repeated from the previous Office Action, and that this holding of Official Notice was not traversed in response to the previous Office Action. Therefore, this holding of Official Notice is set as admitted prior art.) It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the multi-format flash media reader in the system of Hollingsworth in order to allow multiple formats of flash media to be used, thereby increasing the versatility of the system. One example of a multi-format flash media would be the HP 7550 series photo printer that was on the market at least before 1/29/03. This printer is connected to the main processor via USB and is capable of reading smart media cards, compact flash cards and Memory Stick TM. Hollingsworth does not specifically disclose that the reader is a multi-card reader as now claimed. Mambakkam discloses a multi-card reader. See for example figures 3A, 3B and the associated written description. It would have been obvious to a person of ordinary skill in the art at the time of the invention to combine the system of Hollingsworth with a multi-card reader of Mambakkam. This would allow the system of Hollingsworth to accept and read cards of different standard formats, thereby increasing the system's versatility.

5. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
